

Offer on JEROS® Utensil Washer.

Thank you very much for your interest to our products. Enclosed please find our offer on JEROS® model 9120.

JEROS® A/S is a Danish company central located in Denmark and has since 1963 manufactured utensil washers, crate washers and tray cleaners for bakeries, confectioneries, pastry manufactures, butchers, large kitchens, fast food restaurants/chains and the food industry in general.

More than 90% of the production is exported, mainly to the markets in Central Europe and Japan.

In several countries JEROS® has entered into a close cooperation with chains in the retail market, to ensure efficient use of resources in the bakeries. The fast and efficient cleaning of baking trays, crates, pot washing, etc. is important. For many years JEROS® has delivered to foreign chains, such as Rewe, Walmart and Carrefour.

Utensil washers

The 91xx series comprises a total of five models: 9110+9115 with rotating wash systems and 9117+9120+9130 with the unique JEROS® wash frame system.

With a strong focus on energy and resource saving, JEROS® has developed a generation of utensil washers in cleaning friendly design. The entire inside of the machines have undergone a radical development. The interior structure of the vessel now consists solely of inclined surfaces and curves, so that the water automatically and rapidly will be led back to the filters and pumps. All stainless steel surfaces are completely smooth and dirt will not attach itself to the surfaces.

All the machines are built with "i-version" as standard. This means that all the machines have water saving rinse nozzles, that both the wash and rinse tanks are insulated and that the lid consists of 2 layers: Inside, the lid is still made of stainless steel, outside, an insulating and noise reducing material has been added to the lid to increase energy savings further and to ensure minimal emission of heat. The machines therefore require less operating power, resulting in energy and water savings of up to 25% for all the models.

Further unique features are: The optional integrated mixer tab that can also be used for pre-washing and a flush hose that enables the re-use of the hot soap water successively or at the end of the working day, if needed.

Model 9110AB

- Washing area HxWxD: 590 x 690 x 635 mm
- Machine Dimensions HxWxD: 2100/1631 x 840 x 855mm
- Rotating Wash & Rinse Arms
- **A=** Automatic soap dosage
- **B=** Integrated mixer tap
- Self-cleaning program with 85° C clean water
- Adjustable wash temperature
- Automatic start
- Micro control with finger touch

General Data

Wash Tank – 51ltrs

Rinse Tank – 11ltrs

Water Consumption per wash – 4ltrs

Wash Pump capacity – 600

Wash Temp – 58C+

Rinse Temp – 85C

Wash Time (min) – 3+3+6

Wash Pressure – 1.2 Bar

Rinse Pressure – 1.1 Bar

Wash Pump Kw – 1.4Kw

Current Rating – 16 Amp

Connection – 6.5Kw
