

## Your Benefits in Application

### Why CORATEX?

**CORATEX doubles your productivity as cleaning time, material use and energy are halved!**

### Quality

- CORATEX is a high-quality product for the highest demands. Quality awareness is a common thread running through the CORATEX value chain.
- CORATEX is produced in a certified manufacturing environment to assure a constant product performance.
- CORATEX is "Made in Germany".
- CORATEX is a part of [Saint-Gobain Abrasives](#)

### Effective

- CORATEX quickly and reliably purges extra stubborn contamination, oxidation traces and coking residues. In comparison with competitor products, CORATEX always achieved the best results.
- CORATEX can be used directly within the work process and offers the user enormous time- and thus cost savings.
- CORATEX is simple to use.

### Versatile

CORATEX is not a ready-to-use mixture but a concentrate and can be used versatile as an admixture to all common polymers. There is no need to store costly and space-consuming cleaning granules. If high-quality and expensive plastics are used, cleaning granulate made of "PP natural" or "PP crystal clear" can also be used with Coratex to further reduce cleaning costs with good results. PP is resistant up to temperatures of 320°C.

### **For Users**

- CORATEX means fast change of raw materials and higher machines exploitation.
- CORATEX provides you low process cost and easy handling.
- CORATEX can be used while machines are in service, thus saving time and money.
- CORATEX can be mixed with any granulates. You are not necessarily dependent on price increases / volatile pricings of any kind of plastics.
- CORATEX removes even stubborn material contamination, colours and oxidation traces in an optimal manner.
- CORATEX reduces your storage and logistic costs. 10 bottles of CORATEX are less than 13kg; for the corresponding amount of very expensive granular cleaning products (600 kg) you may face higher storage charges and a considerable investement in working capital.

### **For Retailers**

- CORATEX is a recognized high-quality product with over 50 years of market experience.
- CORATEX ensures you long-term and resilient customer contacts. Thousands of track prove: once you will win a customer for CORATEX he / she will insist on having this product.
- Saint-Gobain takes special care of great importance to long-term and trusting partnerships.
- With CORATEX you can reduce your storage and logistics costs. 10 bottles of CORATEX are less than 13 kg, for the same amount of finished granular cleaning products (600 kg) you will incur significantly higher storage costs and a considerably higher capital commitment.
- With CORATEX you will always be able to supply, no matter which plastic is used by your customer.

## **For Equipment Manufacturers**

- CORATEX enables you to broaden your scale of products by a high quality purging product for your machinery equipment. You will enhance your service factor this way, comply to more of your customers' wishes, and you can be sure that your equipment will be have professional purging.
- CORATEX ensures you long-term and resilient customer contacts. Thousands of track prove: once you will win a customer for CORATEX he / she will insist on having this product.
