OVERVIEW

The Elmo Rietschle brand was created when the renowned vacuum Companies Elmo Technology and Rietschle joined forces within Gardner Denver, a recognized leader providing compressed air & gas, vacuum and fluid transfer technologies to industries throughout the world.

Get in touch with ILS Engineering today if you are looking for the best choice of products and technologies, outstanding quality and expert know-how for all applications requiring vacuum or pressure. And meet our greatest asset: a dedicated team of engineers focused on finding and delivering solutions that will make your manufacturing processes faster, safer and more cost-efficient.

Top 6 Consideration When Choosing A Vacuum Blower or Pump:

- ✚ Correct Sizing for Current & Future Demands.
- ✚ Return on Investment.
- ✚ Energy Efficiencies.
- ✚ After Market Support.
- ✚ Cost of Ownership.
- ✚ Reliability.

G – SERIES SIDE CHANNEL BLOWERS

Leading in excellence and innovativeness: Side channel blowers from Elmo Rietschle.

They have proven their reliability in service for many decades, performing flawlessly day in and day out with virtually no down time. Noise levels have been lower than that of most other vacuum pumps and compressors. Their side channel blowers are available in a wide selection for performance ranges up to 3,000 m³/h and differential pressures of up to 1,000 mbar. They cover the most varied requirements flexibly and powerfully.

ILS Engineering excels in quality and professionalism for services provided on all works carried out by our experienced service team. We provide a 24/7 nationwide emergency call out. Turnkey solutions for vacuum pump installation. Complete servicing requirements on all vacuum pumps along with a complete range of OEM spares.
